

Give your wardrobe a spring makeover with G star's collection

If winter is getting you down and the recent snow has done little to uplift you, maybe what you need is a new spring wardrobe to get you in the mood.

As luck would have it, G star's new Spring/Summer 2012 collection could be just the ticket: from funky denim jackets and snazzy waistcoats to ultra-stylish **cropped jeans for women**, the latest G star collection is likely to be their trendiest yet.

And who better to be the face of this latest rock 'n' roll-style G star campaign than the sassy French actress Cl  mence Po  sy? Best known for her roles in *Gossip Girl* and as Fleur Delacour in the *Harry Potter* series, the twenty-nine-year old actress was always going to be a hit.

She told *The Telegraph*: "I'd seen the (G star) campaigns before and they really stand out in magazines, it just felt very simple and kind of rock 'n' roll, so I said 'yes' immediately."

Po  sy replaces Bond girl Gemma Arterton, who had been the face of previous G-star campaigns. Talking to Grazia, she described her favourite outfit from the **G star collection**:

"My favourite outfit was the simplest one of all. I'd been trying to find the perfect jean jacket in every vintage shop for about five years and, all of a sudden, it was there."

G-star's latest collection has a range of jean jackets for both men and women, as well as branded shoulder bags, cowboy-style shirts and blouses and, of course, no wardrobe would be complete without a pair or two of G star's denim jeans.

And as for Po  sy's advice on finding the perfect pair of jeans (let's face it, we all want to know), she advises *The Telegraph*: "It's about finding the shape that you feel the most comfortable in. I don't necessarily believe in what some magazines say about finding the shape that is going to make you look better, or when they say 'with this body type you should wear this shape,' I think whatever you can wear all day and run around in and go out with, that is what you should be wearing."
